

Evaluating your OAB treatment

Not all treatments work the same for every patient. If you are still experiencing overactive bladder (OAB) symptoms, talk to your doctor about what options may be appropriate for you.

ANSWER THE FOLLOWING QUESTIONS AND DISCUSS THEM WITH YOUR DOCTOR

- 1 Are you taking your OAB treatment as prescribed?
- 2 Do you feel your OAB symptoms are under control with your current OAB treatment?
- 3 How many times have you leaked urine this week?
- 4 Do you feel your OAB treatment may not be right for you?
- 5 How many OAB medications have you already tried?
- 6 For how many weeks or months did you use each medication?
- 7 Have you discussed other treatments with your doctor?
