

# Setting expectations for your OAB treatment

Your physician prescribed a treatment to help you manage your overactive bladder (OAB) symptoms of urinary leakage, urgency, and frequency.

## ALWAYS REMEMBER TO:

- 1 Take your OAB medication** every day or as prescribed by your physician.
- 2 Be patient** and stick with your treatment, as it may need time to work.
- 3 Remember to refill** your prescription.
- 4 Keep track** of your progress and communicate with your doctor. Not all treatments work the same for every patient. You should speak to your doctor if you have questions.

**Speak with your doctor if you still have OAB symptoms or if you are experiencing bothersome side effects.**
